

Tactics Database

collected by: Uwe Auerswald, Germany
edited for CBH by: Guenther Ossimitz, Austria

Most of the 3500 positions are from actual games (some out of variations).

The combinations are checked with Fritz 4, but enjoy them at your own risk!

The players names are taken as they were given in the various sources, so name inconsistencies may occur - sorry!

The combinations are classified according to difficulty and theme (in the commentators field):

- v - several variants in the solution possible

- 2 - difficulty (1: easiest; 5: hardest)

- Z - theme of the combination:

Z: removal of defence
A: deflection
H: decoy
R: removal
F: pin
U: interference
W: pawn promotion
P: remis combinations
X: different themes
- + - the task is not to win or draw, but just to get an advantage.
- ! - it is unclear, whether an advantage can be obtained, but there are chances for a promising attack.
- = - White or black goes for a favorable endgame.

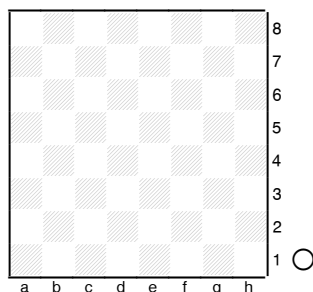

Access to the positions:

Right-click on the database icon gives access to the "themes" key. There you find the positions sorted according to their difficulty (1 - 5).

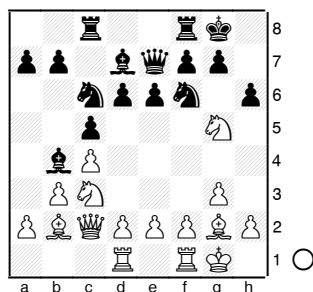

In the "tactics" key you find the positions sorted according to the tactic themes (A,H,R,...X,+,!,=)

mentioned above.
Enjoy!
